
Care & Maintenance Guide

BEFORE USE

- 💧 Carefully check the installation for leaks
- 💧 If further building work is to be carried out in the vicinity, cover the mixer tap with a plastic bag to avoid damaging the finish
- 💧 Please ensure that the installation complies with the local plumbing codes

CARE & MAINTENANCE

- 💧 Occasional cleaning with warm soapy water, followed by a polish with a soft cloth is all that is required to keep the plated finish in good condition.
- 💧 **Do not use proprietary abrasive liquids, powders, or pads to clean the faucet. You will damage the plated finish and void your warranty.**
- 💧 An aerator is fitted to the outlet of the spout, this may need occasional cleaning. This will be evident when the water flow slows down to an unacceptable level. To accomplish this unscrew the outlet in a counter-clockwise direction and remove the aerator, rinse thoroughly in clean water and re-install.
