Modern yet elegant, the Trademporary Collection from Perrin & Rowe builds upon the design and engineering quality for which Perrin & Rowe fittings have become renowned and progresses beyond classical styling to offer a range of bathroom brassware that is, quite simply, comfortably contemporary.

Trademporary designs feature all the solidity of the Perrin & Rowe Traditional Collection, but with a clever contemporary twist – which makes them ideal for anyone looking for a design conscious, but durable brassware solution.

Monobloc basin and bidet mixers can be selected with either sleek, tapered handles – or minimalist crossheads – and feature neat, streamlined spouts. Meanwhile, a Perrin & Rowe signature piece, the thermostatic shower, is available with a multitude of options that includes exposed and concealed mixers and additional handshowers. Further design options can be created, by the use of a secondary outlet to allow showering accessories such as tub fillers, rainbars and body sprays to be included. Showerheads range from multi-functional, fully adjustable styles to a modern version of the famous ‘watering can’ design.

All shower variations integrate:-

- ❖ Dual controls.
- ❖ Automatic safety shut-off should the cold water supply fail.
- ❖ Pre-set temperature limit stop set at 38°C to prevent risk of scalding.
- ❖ All valves are suitable for both low and high water pressures.

Perrin & Rowe showers will deliver an average of 10 gallons (45.5 litres) per minute, with a pressure of just 3 bar (45psi) and incorporate 3/4 “high flow” valves to promote a superior flow rate.

The use of only the most superior materials and components means that Perrin & Rowe fittings are built for life:-

- ❖ Exclusively manufactured in the UK within a process accredited to ISO 9001.
- ❖ Valve casings engineered from solid brass bar and flash nickel plated for extra durability.
- ❖ A three part plating process provides an exceptional, high quality finish that exceeds industry standards and is backed by our P & R guarantee.
- ❖ Quarter turn, ceramic disc technology used as standard on all valves and guaranteed for 5 years.

Fast becoming the preferred brand of leading architects and designers, Perrin & Rowe brassware has recently been chosen by the Savoy Group, Sandy Lane, Celtic Manor and the Sofitel/Accor Group.

Perrin & Rowe operates a bespoke design service that enables designs to be tailored, creating unique bathroom brassware collections.
